Title: METHOD OF VERIFYING THE AUTHENTICITY OF A SECURITY DOCUMENT AND DOCUMENT FOR USE IN SUCH A METHOD

AMENDMENT

Seattle, Washington 98101

March 20, 2002

TO THE COMMISSIONER FOR PATENTS:

Please amend the above-identified application as follows:

In the Claims:

8. (Amended) Method according to claim 1, wherein the optical projection element acts to generate the patterned beam by diffraction of the light beam transmitted through the security document.

9. (Amended) Method according to claim 1, wherein the security document includes a second at least partially transparent portion, the method further including the step of:

folding the security document such that part only of the light beam from the light beam source passes firstly through the second at least partially transparent portion before being transmitted through said first at least partially transparent portion, said second at least partially transparent portion thus acting as a pseudo point light source.

10. (Amended) Method according to claim 1, wherein the security document includes an optical image or device, applied to the opacifying portion, which interacts with the patterned beam impinging on the opacifying portion to create a visual security effect, the method further including the step of:

verifying the presence of the visual security effect.
